

Address Marker Posting Instructions

- **Who should post my address marker?** Property owners are responsible for having their address marker posted. As an option the 911 Mapping department address marker signs available for \$20 each, see the photo below for an example. If you wish to order an address sign, contact the 911 Mapping department.
- **When should my address marker be posted?** According to Rabun County Ordinance you have 14 days to post your address marker after receiving notification from the 911 Mapping department.
- **Where should my address marker be posted?** The marker should be posted at the beginning of your driveway. **DO NOT** post your address marker at the beginning of your road where the road name sign is located. (This is of no benefit to public safety personnel and could cause confusion with 911 response).
- **How should my address marker be posted?** The marker should be posted using numbers at least 4 inches tall. Either the numbers or the background should be reflective, or both. The colors of the numbers and the background should contrast. The marker should be high enough off of the ground so that grass or other vegetation does not cover the numbers. It should be clearly visible to approaching vehicles at night.
- **Can I post my address marker with my mailbox?** The marker may be attached to the same post as your mailbox, as long as it is at the beginning of your driveway. If the postal service requires that your mailbox be posted on the opposite side of the road from your driveway, or at the beginning of the road, then you will need to post your address marker separately.
- **What if I share a driveway with a neighbor?** Your address marker should be posted at the beginning of the shared driveway, as well as where the driveway splits.

The mapping department has address signs, map books and wall maps available for \$20 each.
